As the second-hand economy became popular, people began selling or buying used goods. Unlike purchases of new products that can be expensive, the secondary market allows you to buy desired goods at a reasonable price. If you've visited such second-hand markets or platforms, you will find that electronics like iPhone and iPad devices are among the most popular products. Though buying a second-hand iPhone or iPad is cost-effective, such gadgets often come with various locks like iCloud Activation Lock. Thus, you may need an iOS locker to remove the Apple ID without a passcode or bypass iCloud Activation Lock without the previous owner's Apple ID to access your device without the problem. If this is your case, here is a list of highly-rated iCloud Activation bypass tools you can use to achieve your goal. iCloud Bypass Tool Free or Paid Online or Offline Supported Devices EaseUS MobiUnlock Free & Paid Offline iPhone, iPad, and iPod Touch Checkm8 Paid Offline iPhones that run iOS 12 to iOS 15.6.1 iCloudUnlock Free Offline iPhone X, 8 Plus, 8, 7 Plus, 7, SE, 6S Plus. 6S, 6 Plus, 6, 5S, 5C, 5, 4S, 4 and all iPad Versions IMEI Doctor Paid Online iPhone, iPad, Apple Watch, Mac iPhoneIMEI Paid Online iPhone, iPad, Apple Watch, Mac IMEIUnlockSIM Paid Online iPhone, iPad, iWatch Note: Before writing this guide, we've spent much of our time researching, testing, and using each software so that we can offer true and reliable information about them to you. Each of these tools will be detailed with its pros and cons. After weighing these factors, you can choose the right iCloud Activation Lock removal freesoftware to bypass activation lock on iOS devices based on your needs. 1. EaseUS MobiUnlock EaseUS MobiUnlock is our top recommended tool to bypass iCloud Activation Lock on iOS 12.3 up to 14.8.1. It's a comprehensive iPhone unlocker tool that includes advanced features like letting you bypass Activation Lock, remove Apple ID, unlock iPhone without a passcode, etc. Besides, here are a bunch of benefits you can get from EaseUS MobiUnlock: Remove your Apple ID if you forget it Get rid of the screen passcode on your iPhone and iPad devices Turn off the Screen Time passcode without passcode Find the saved passwords on your iPhone or iPad Recover iTunes backup password As you see above, EaseUS MobiUnlock is one of the iCloud activation lock removal tools for iOS devices that can satisfy various needs. On top of that, it offers a money-back guarantee and 24/7 expert support. So you can get your money back if you find it useless. However, EaseUS MobiUnlock isn't without its faults. The biggest problem with using it is that it requires jailbreaking your device while bypassing your iCloud lock, making your Apple devices vulnerable to viruses. But that doesn't matter if you use it correctly without downloading illegal apps. Sounds great, right? If it does, download it and give this iCloud Bypass tool free a trial. Let's see how to bypass iCloud activation lock: Download for PCDownload for Mac Step 1. Launch EaseUS MobiUnlock on your computer and connect your iPhone or iPadto the PC. Click "Bypass Activation Lock." Check out the "Term of Use" and click "I Agree" to proceed if you agree with all content. Step 2. Click "Start" to move to the next step - jailbreack your iPhone or iPad.Click "Jailbreak Tutorial" to see how to jailbreak your Apple device. (Note that if your iPhone is running iOS 15 - iOS 16.4, the EaseUS tool will jailbreak the device automatically.) If you already jailbroke your device, click "Jailbreak Completed" to proceed. Step 3. Click "Bypass Now," and EaseUS MobiUnlock will start removing Activation Lock from your iPhone or iPad. Step 4.Wait for the process to complete. After the process, click "OK" to confirm, and you can set up your iPhone or iPad without obstacles. 2. Checkm8 Checkm8 is another reliable tool to remove iCloud Activation Lock screen on iPhones that run iOS 12 to iOS 15.6.1. It is simple to use and has a built-in jailbreak tool. Thus, you don't have to install any additional programs. Besides, it offers a step-by-step video guide on how it works on its product information page, making it reasonably easy for people who are new to this kind of work. The price for such a service varies depending on your device model, which ranges from $19.99 to $64.99. After bypassing the Activation Lock, you can place phone calls and text messages, surf the internet, etc. However, it is worth noting that the unlock of the activation removal of the device occurs only once. After bypassing the Activation Lock, your device will return to normal without any problems unless you reset it to factory settings. 3. iCloudUnlock iCloudUnlock is our third recommendation for iCloud activation lock removal tools. It is convenient and easy to bypass iCloud activation lock screen. With it, you will have no problem bypassing iCloud Activation Lock for almost all Apple devices. Like other iCloud bypass tools, it also offers 24/7 support, which can help address issues whenever needed. Since this tool is straightforward, we won't dive into details. You can download it directly from the official site and try it. 4. IMEI Doctor IMEI Doctor is an online iCloud activation lock bypass service that allows you to remove the iCloud account from your iPhone/iPad permanently. All you need to do is provide your IMEI number. But note that there is no guarantee that it can unlock your iCloud lock. While before starting the unlocking process, it will charge you a fee, guiding you to follow the unlock. Then, they will ask you to pay another sum to follow through with the unlock. After that, they will send a page with a timer. Sometimes, it can unlock your device successfully. But you will lose your money if it fails to unlock your iCloud account. So, it would help if you carefully use such a service. 5. iPhoneIMEI iPhone IMEI offers a simple and quick online iCloud Activation lock removal tool for iOS users. Like other online iCloud Activation removal services, this site also can't 100% guarantee they can unlock your device. Another important thing you should learn before using this online tool is that it will charge you an extra fee for a premium service. If this is not what you want, jump to other options in this guide. 6. IMEIUnlockSIM IMEIUnlockSIM is another online iCloud unlock service that can help unlock iCloud Activation Lock from almost all Apple devices, as long as you know the IMEI number. After removing Activation Lock, you can add your iCloud address and continue to use your iPhone generally as a new device. Currently, it supports iPhone 12, 12 mini, 12 Pro, and 12 Pro Max, XS Max, XS, XR, X, 8+, 8, 7 Plus, 7, SE, 6S, 6S Plus, 6+, 6, 5S, 5C, 5, 4S, 4, iPad, any Model, and Apple Watch. But any online service has the potential to make your device brick, so you'd better be careful to use any of them. The Final Words If you can't enter your device because of being locked out, it's brilliant for you to have any iPhone unlockers installed on your computer or add this guide to your Favorite. As you can see from the phone unlock programs above, desktop-based iPhone unlockers like EaseUS MobiUnlock are safe and green with a money-back guarantee and customer support. While online unlock services are more convenient without installing any software. But some of these online services are scammers. Now, you can choose the exemplary service to use after weighing the pros and cons of each method. Frequently Asked Questions About iCloud Bypass Tools Suppose you may want to dig deeper into the iCloud bypass tools topic, so we collect some of the most frequently asked questions about it. Is it possible to bypass the iCloud Activation lock? As you can see above, it's possible to bypass the iCloud lock as long as you choose the right tool or service. But no matter what tool or service you choose, it's inevitable to jailbreak your device. That will break the limitations of Apple's operating system and gain more control over your device. However, on the other hand, you lose pretty much all of Apple's security measures. Can we bypass iPhone iCloud Activation Lock for free? As far as we know, there's no free unlocking service online because such unlock tasks require specific technology to complete, which requires many technicians to spend much of their time and energy. You pay for their time, not for a particular program. Does CheckM8 work on iOS 15? YES, it does. CheckM8 supports iOS 15.6. Lockra1n v2.1 Beta 1 has some important changes since the the 2.0 Beta 3. Some notable ones are:Added iPhone X iOS 16 Mounting issue fix: Lockra1n had trouble when mounting the user data partition of the device (/mnt2) when in SSH ramdisk mode. This has been addressed in version 2.1 by utilizing the Palera1n ramdisk instead of SSHRD_Script, which contains fixed r/w permissions.Normal Mode Bypass: This is a feature I was quite excited about releasing. You can now choose your bypass mode when unlocking your devices.The Normal mode bypass is probably quicker, because it only requires a jailbreak. The software will guide you through the process carefully.If the Normal mode bypass fails though, use the ramdisk mode bypass. It is probably more stable, and the ramdisk method is known to work better. It is up to you which option to use. Please try out the Normal mode bypass though because I'm looking for feedback on how it worked for others. If the Normal mode bypass was successful OR failed, message me on X (Twitter) @AlwaysAppleFTD or Instagram @finn.desilva with the information.Updated UI: This is a smaller feature of Lockra1n v2.1. The tool's UI now has been redesigned to accommodate the new features and buttons.Enjoy!PLEASE NOTE: This app may not be perfect. Please dont get upset of there are bugs, just report it to me and I will do my best to issue a fix. While I have done excessive testing on my devices, the software is probably not finalized yet.Kindly report any bugs to me as I aim to make the software the best it can be.To contact me, you can message me on X (Twitter) @AlwaysAppleFTD, Instagram @finn.desilva or email alwaysappleftd@icloud.com. Thank you for your participation in this new software! Visit the Lockra1n page on my website at: for details.Once on the site, click the latest top blue download button in the How to Download Lockra1n section of the page to open the file link.The tool will start downloading. Make sure you allow downloads from my site if it's your first time downloading!If you are downloading the previous beta, an external link to the file sharing platform will be opened.From there, once the site opens, click the blue download button on MediaFire to start the download.I recommend using the latest version though because features are ONLY added (never removed) and the software's stability is improved with every update. If you really need the old version though, go ahead. I wouldn't prevent you.NOTE: If you see a message that the app cannot be opened because it's from an unidentified developer, just right-click on the app file and select "Open." This will bypass the unidentified developer message and open the app.If the app still wont open, follow these steps:Open a blank Terminal window. You can find the Terminal app in the Other folder in your Launchpad.Type, in lowercase, xattr -cr (without quotes), then drag and drop the Lockra1n application you downloaded into the Terminal window.Press Enter to run the command.These steps should allow the app to open. If you encounter any further launching issues, please contact me. Open the app you downloaded from here.If you see the "Untrusted Developer" message, follow the steps above to resolve it.For any other launching issues, please contact me.Click the "Prepare Lockra1n" button to ensure everything is installed and ready for using Lockra1n.Click the "Search for Device" button. This will pair your device with the computer. Make sure to hit "Trust" on the device if prompted!Click the "Generate Activation Files" button. It will check the registration and generate activation tickets for your device.If you are not registered, the tool will prompt you to do so. You can visit the free registration page here: you encounter an error like "Failed to generate tickets!", DO NOT ATTEMPT to activate! This could brick your device, requiring a restore in most cases to fix.Click either the "Bypass Device (Ramdisk)" or the "Bypass Device (Normal mode)" button. As mentioned earlier, the ramdisk mode bypass is probably more reliable, but please do try out the Normal mode bypass function. I'd love to hear if it worked or not.To enter DFU Mode on your device, the method varies depending on your device model.I recommend Googling "How to Enter DFU Mode on " and then your device model.For example, "How to Enter DFU Mode on iPhone 8".The tool will mount the device's filesystem, inject the tickets, apply some filesystem modifications, and reboot your device. After your device turns back on, you will be on the Home Screen!Also note that the "Re-Lock device (unhide baseband, ramdisk)" and the "Re-Lock device (unhide baseband, normal mode)" buttons will not remove the activation tickets. It just un-hides the baseband so the device returns to the Setup screen. To remove the tickets from the device, just do a clean restore in iTunes (older macOS versions), Finder, or 3uTools. DO NOT "Update" or "Retain User's Data"! This can in some cases brick the device, forcing a restore. It's also just a waste of time.Once everything is done, your device is bypassed untethered!Enjoy bypassing your devices using this software!As mentioned above, report any bugs you encounter back to me.Thank you for your participation in this new software! FRP (Factory Reset Protection) which is also known as FRP lock or iCloud lock was introduced for iOS devices to combat fraudulent activities, and ensure that only original iOS device users have the access to factory reset their iPhone, iPad or iPod touch.
