## How much does quickbooks online cost per year

QuickBooks pricing varies based on the chosen product and number of users needed. Here's an overview of the different options and their costs, including details for each to help you find the best accounting software for your needs. Best for: Self-employed freelancers, contractors, and sole proprietors. QuickBooks Solopreneur offers business banking, estimates, invoicing, payment processing, basic reporting, mileage tracking, and basic income and expense tracking. QuickBooks Solopreneur is a "lite" version of the online product, ideal for individuals with varied income sources and those who need to separate personal and business finances. Customer support includes 24/7 help from virtual assistants (chatbots), as well as live phone and chat support from 6 a.m. to 6 p.m. PST Monday through Friday, and on Saturday. Best for: Most small businesses across various industries, particularly those that work with accountants regularly or require a solution that can grow with their business. For a single user, Silver features begin at \$2,717 per year, including payroll. The Gold plan costs \$5,364 annually for one user and is offered as a monthly subscription only. It includes advanced inventory management, pricing rules, and workflow approvals. Additionally, the Platinum tier offers Assisted Payroll services to handle federal and state tax filings for each employee at \$1 per pay period. Users can also integrate Salesforce CRM for \$150/month or QuickBooks Time Elite for \$5/employee monthly. QuickBooks Online Pricing Explained: Which Plan is Right for You? When choosing a QuickBooks Online plan, consider the number of users and features your business requires. Beyond the basic subscription, expect additional charges for add-ons like payroll services and bookkeeping support. The four QuickBooks Online plans range from \$35 to \$235 per month, depending on the level of service needed. Here's a breakdown of each plan: QuickBooks Simple Start: \$35/month (1 user) - Ideal for basic accounting needs QuickBooks Essentials: \$65/month (up to 3 users) - Includes time tracking and more features QuickBooks Plus: \$99/month (up to 5 users) - Offers project management, inventory, and advanced reporting QuickBooks Advanced: \$235/month (up to 25 users) - Suitable for businesses requiring more advanced features QuickBooks Online Plus offers advanced features for larger businesses, including unlimited sales channels, project management, job costing, inventory class tracking, budgeting, and priority customer support. The Advanced plan costs \$235/month and supports up to 25 users, with all the features of QuickBooks Online Plus. QuickBooks Online pricing varies but starts at \$17.99 and includes features such as W-2 support. Standard checks cost around \$46.26 per 50 checks. Integrations, including third-party add-ons like Shopify and Gusto, may incur additional monthly fees. QuickBooks Payments offers a range of payment processors, with charges varying from 1% ACH transfers to 3.5% keyed-in cards. Discounts are often available on the website, but note that using a free trial before purchase makes them invalid. QuickBooks Online Pricing Plan Breakdown to Suit Your Business Needs Considering your business needs, budget, and requirements, choose the right QuickBooks Online plan. The pricing starts at \$35/month for Simple Start, with additional tiers offering more features. Assess your needs: - Basic accounting for one user (Simple Start) - Time tracking and support up to three users (Essentials) - Key features like inventory, project management, and five-user support (Plus) - Priority customer support, advanced reporting, and 25-user support (Advanced) QuickBooks Online is scalable, allowing you to start small and upgrade later. QuickBooks Online Pricing Explained QuickBooks' Simple Start plan offers additional features beyond the Self-employed Plan, including sales and tax tracking, contractor management, and estimate creation. It also provides in-depth reporting dashboards, albeit with a slightly steeper learning curve. Priced at \$35 per month (discounted to \$17.50 for the first three months), this plan is best suited for small businesses with one user. Key features include basic bookkeeping tools, budgeting capabilities, and a supplier database. Additionally, users can create invoices and estimates in unlimited quantities, track expenses, manage up to 1,099 contractors, and integrate live bank feeds. Vehicle tracking and limited reporting tools are also available on this plan. For growing small businesses with multiple suppliers, employees, and clients, the Essentials plan (\$65 per month or \$32.50 for the first three months) is a more suitable option. This tier includes accounts payable functions, bill tracking, recurring billing setup, expense tracking, and multi-currency payment recording. The Essentials plan also offers time tracking features, allowing users to categorize and add billable hours to invoices automatically. Lastly, the QuickBooks Plus plan (\$99 per month or \$49.50 for the first three months) supports five users and provides a range of advanced features, including unlimited user lists, purchase orders, and sales receipts. This plan is ideal for larger businesses with complex operations. The Plus plan is ideal for mid-sized businesses with multiple clients, inventory, or ongoing projects. It offers tracking of project profitability, automatic notifications for low inventory, and product data import from various platforms. Additionally, this plan provides a single location to view all projects, labor costs, payroll, and expenses. QuickBooks has significantly reduced manual effort in accounting, making it an excellent choice for businesses looking to save time. However, setting up workflows can be challenging, especially for new users or those without dedicated time to learn the software. In addition to its core features, QuickBooks offers various add-ons, including payroll processing, which is useful for businesses with multiple employees. The payroll pricing plans include Core, Premium, and Elite, each offering more features than the previous one, with prices starting at \$50 per user plus \$6 per employee per month. The plans are upgradeable, allowing businesses to start with the Core plan and adjust as needed. QuickBooks also offers bundled plans, such as pairing the Core plan with the Simple Start or Essentials accounting plan. To ensure proper use of the software, QuickBooks Live Bookkeeping connects businesses with certified experts to manage their books, including transaction categorization, account reconciliation, and report creation. The custom price starts at \$300 per month, depending on business size. For setup assistance, QuickBooks Live Bookkeeping offers a one-time session with an expert, which previously cost \$50, to help with tasks like connecting bank accounts and setting up automated processes. Overall, while QuickBooks requires some effort to set up and use effectively, its features and add-ons make it a valuable tool for businesses looking to streamline their accounting processes. Live Bookkeeping sessions can help clarify questions and get your accounting software started on the right foot. QuickBooks Capital is also available, but eligibility depends on your QuickBooks Online account status. Tax forms are sold separately for an extra cost, varying by state. Payroll plans include printed forms or automatic filings. QuickBooks no longer allows online sales tax filing; business taxes must be filed manually and updated in the account. Some payroll plans include free forms, while others require premium plans for automatic filings. You can buy standard, wallet, manual, secure, basic, office, and away checks from QuickBooks, but they are pricey compared to competitors. Comparison with FreshBooks shows it starts at \$19 per month, with a 60% discount offer for 6 months. Zoho Books offers a free plan and is significantly cheaper than QuickBooks. Xero's plans start at \$20 per month and are more affordable than QuickBooks' prices. Xero's current promotional offer lets you get its plans for just a dollar, two dollars thirty-five cents, or four dollars per month respectively. Before we explore the details of QuickBooks' various plans and their value, let's take a look at some of the latest deals and discounts on top-notch accounting software from the biggest and best QuickBooks alternatives out there. Essentially, QuickBooks Online is the cloud-based version of QuickBooks that stores your data online and allows access to it anywhere on any device. On the other hand, QuickBooks Desktop is installed locally with a license pricing model. One thing worth considering is the difference in security - with QuickBooks Online, your security is handled by the software itself, whereas you'll be responsible for securing your own data when using QuickBooks Desktop. As far as pricing goes, QuickBooks Online has a monthly structure where you pick a plan and pay each month, while QuickBooks Desktop comes with a three-year license or yearly updates - but keep in mind that there's only one plan available now. Desktop Enterprise, which features built-in accounting and payroll for up to 40 users. QuickBooks Online also boasts more automation features, making it a better fit for small businesses looking to streamline their operations. In contrast, QuickBooks Desktop has a somewhat dated user interface and fewer integrations compared to QuickBooks Online. QuickBooks Online's wide range of integrations and payment gateways makes managing paperwork and filing tax information a breeze, especially with popular names like PayPal, Shopify, and MailChimp on board. With over 750 integrations available, you can easily connect your account to useful third-party apps and services such as Google's G Suite or Microsoft's 365. QuickBooks Online is a powerful tool for freelancers and small businesses, offering payroll automation, integration with popular payment processors like PayPal and Square, and access to over 750 third-party integrations. The platform supports various pricing plans, each tailored to specific business needs. The Self-Employed Plan is ideal for solo freelancers, providing basic accounting features without the need for employee management or complex sales tracking. The Simple Start Plan offers more advanced capabilities, including invoicing and estimate creation, as well as access to Intuit Assist, an AI-powered automation tool. For larger businesses with multiple employees and recurring payments, the Plus Plan is a better option, offering time tracking and inventory management features. The Advanced plan is designed for large corporations that require additional support features, such as a dedicated manager or virtual training classes. At Tech.co, we conducted thorough research to evaluate accounting software, ensuring impartial recommendations for users. We've developed an extensive methodology for evaluating accounting software by scoring platforms against six key categories and 25 subcategories, covering a total of 1512 areas of investigation. Our hands-on testing process, involving 37 user tests completed over 57 hours, allows us to gain a deeper understanding of each platform's average user experience. Our primary testing categories include: ###Core Accounting Features We assess how well a platform manages accounting tasks, focusing on key bookkeeping features such as invoicing, tax preparation, journal entry, time tracking, financial transactions, and payment support. ###Operational Efficiency We evaluate a system's ability to ensure seamless day-to-day processes, paying attention to third-party integrations, collaboration tools, AI automation, and customization options. ###Financial Planning We examine a platform's capacity for measuring income, profits, and losses, specifically checking for the presence and quality of forecasting and budgeting, inventory management, reporting, and compliance tools. ###Help and Support We assess the reliability and usefulness of a platform's support system, focusing on support options, such as 24/7 support, knowledge center accuracy, cloud backup, and security safeguards. ###Pricing We compare the overall cost of each platform, taking into account monthly costs, set-up fees, hidden fees, and free plans, as well as contract terms and termination costs. ###User Experience Our evaluation includes an overall judgment of how easily users can interact with the platform, gathering feedback from our team on ease of use, user satisfaction, and likelihood of recommendation to another business. We recognize that accounting software is constantly evolving and therefore, conduct regular testing by full-time product researchers at Tech.co to ensure our results remain relevant. Seeking an accountant with expertise in QuickBooks Online is a must. This platform boasts cloud storage for all data, allowing users to access it from anywhere. Additionally, Online offers more extensive integrations and enhanced security features, making it easier to use compared to its Desktop counterpart. Despite having fewer advanced features, QuickBooks Online prioritizes user-friendliness with a streamlined interface that expedites the learning process even for those without prior experience in accounting software. The ability to seamlessly upgrade or downgrade plans is also a notable advantage of using QuickBooks Online. To do so, users must navigate to their Settings page within the software and select either "Upgrade your plan" or "Downgrade your plan." This allows them to browse available options and choose the most suitable one for their needs. For those looking to explore other free accounting software alternatives, there are numerous options worth considering. By clicking on links or signing up through Tech.co, users may receive a referral fee that supports the provision of unbiased reviews and ratings. The editorial team at Tech.co remains impartial, ensuring that rankings and reviews remain based on objective research analysis.
